

Spring

April is National Rosacea Month

We can't think of a better way to bring awareness to this troublesome skin condition than to offer insights into treatments and products to combat it. For those with and without rosacea, Dr Lott has the answers you're looking for!

What did Dr. Lott Bring Back From Her Dermatology Meeting?

It is an incredible experience to be able to spend the day one-on-one with one of dermatology's luminaries. I get to learn tips and tricks based on their long experience with the lasers, Botox and fillers. I am looking forward to sharing my new found techniques, particularly with lasers – 10% off this month!

The main message from the AAD: With melanomas on the rise, it is more important than ever to use a good sun screen and schedule annual total body skin exams with us.

What Laser Treatments are Offered & Can They Help?

- **GEMINI LASER:** Favorite of the laser surgeons for both red and brown, skin rejuvenation and acne.
- **V-BEAM LASER:** Initially developed for Port wine stains (the red/purple birthmarks), now also widely used for rosacea, red scars and red stretch marks. Can help some dark under eye circles.
- **PIXEL FRACTIONIZED CO² LASER:** The current "hot" treatment for rejuvenation with minimal downtime. It's taking fewer treatments to achieve the results of its predecessor, the fraxel and it is one of the few things that actually helps stimulate new collagen growth!

Are Products Effective in Treating My Red & Brown Spots?

We are pleased to introduce a new ColoreScience product designed to be used throughout the day to even skin tone, reduce redness from blemishes and rosacea, even brown discoloration caused by blemishes, scars, hyper-pigmentation AND (Drum Roll, please) it **CONTROLS OIL!** Pam is so excited about **Let Me Be Clear**. After using it for almost a month, she has noticed marked reduction in oiliness, pore appearance and an increase in blemish recovery.

ColoreScience's Red to Ready System is comprised of products to combat and conceal red and brown "spots." It fits right in with Dr Lott's April Special for treating those "spots." Because we're so impressed with these two, we are offering a **10%** discount on them in April **PLUS** Pam is offering **FREE** Consults for application!

You Get Another Chance

The **Restylane/Perlane Rebates** offered last month are being extended throughout April! So if you missed out, you can still save \$25 on the purchase of 1 syringe; \$100 for 2 syringes and \$150 when you use 3 syringes in a single visit.

LIPO Story - "A Happy Ending"

Time for my three month check-up and things look great. I'm going to feel really good about myself when I attend my class reunion! Having liposuction has been a very positive experience. I knew it wasn't a weight loss solution but it worked wonders on my "trouble spots" that didn't seem to respond to any exercise I tried. Maintaining healthy habits with diet and exercise will ensure continued success and I only have one regret: that I waited so long to look into it. What are YOU waiting for? (The evaluation to see if you are a candidate is FREE!)
