

## Happy Anniversary to Us!

### Dr. Lott's Thank You Gifts:

We have an armload of 10% off Anniversary Specials for you and they're "All Things Allergan!" Keeping ahead of the Birthday Fairy's "gifts" for the past 3 years has been an exciting challenge. Some of our favorite weapons are our anniversary treats.

Nothing works as well for wrinkles as accurately placed **Botox** for the lines caused by muscle movement. The valleys left when the facial fat pads headed south have responded well to the **Juvederm** fillers, particularly in the lips and cheeks.

Our thin, skimpy lashes are growing better than dandelions with the amazing **Latisse**! Most of us at the clinic have to reduce the frequency of application which makes that tiny bottle last even longer. It is a prescription product so you must be seen and evaluated before you can obtain **Latisse**. We take before pictures so that you can measure your progress.

**Prevage** (with the active ingredient, Idebenone) outscored several other antioxidants, including Kinetin in Kinerase. It was way ahead of Dr. Perricone's Lipoic Acid. We carry **PrevageMD** which has a higher concentration than the product available in our local department stores. As helpful as antioxidants are, they are not as important to the skin as good sunscreens and products from the Vitamin A acid family.

### Pam's Thank You Gift:

It's one of Dr Lott's favorites....the "Cadillac" of microdermabrasions: The **SilkPeel**. This spa-like treatment features a medical-grade diamond tipped wand that infuses solutions for hydration, acne, or hyperpigmentation into the skin as it exfoliates the outer layers, stimulating new cell growth. Treat yourself to a 10% discount!

### Want Some Icing on That Cake??

We want to make it easy for you to protect your precious skin this summer, so take 10% off any of our effective Sunscreens. With this one-two punch, we're hoping to knock the Birthday Fairy for a loop!

### And the Cherry on Top...

Take 15% OFF any purchases made on our Anniversary, Monday June 15 as well as any appointments made that day for June/July treatments!!! \*

### Test Your Sunscreen IQ (in our office)

You'll be twice as glad you stopped in to see us this month.... Take a brief ungraded Sunscreen IQ Quiz and you'll be eligible to win one of our newest and most popular sunscreens! You can say "goodbye" to applying liquid sunscreens with this water resistant SPF 30 **mineral sunscreen**. Using the built-in brush eliminates the 20 minute wait and makes this **Colorescience** product easy to apply over makeup for touch-ups throughout the day. Try the tester on our counter and see for yourself how incredible it is. The golfers love it!

### Try this Test (at home)

Buyers Beware! All minerals are NOT created equal. Minerals found in **Colorescience** makeup protect your skin from UVA and UVB sun rays. Water-resistant minerals form a protection barrier on the skin. Real micronized minerals that are processed properly are completely water-proof and will not dissolve in water, which is why they float on top. Ingredients that muddy the water or bubble or foam in the water are clear indicators that they are not real minerals. Those that sink to the bottom, when placed in water, are not properly processed. See for yourself!
