

The ABC's of a Beautiful You...

All About Skin Discoloration!

A great focus for end of summer; this month we are highlighting 2 very successful treatments in the battle to fight hyper-pigmentation – those undesirable brown spots. **10% Off** either treatment!

The Fractional CO² Laser known by its trade name, the **Pixel Perfect**, is an advanced form of laser treatment that improves sun damaged skin, smoothes fine lines and wrinkles, shrinks pores, fills in acne scars and blends uneven pigmentation. Patients who undergo this treatment can expect some redness similar to that of sunburn but not nearly as severe as with the old type of laser resurfacing. The recovery time is also shorter at about four days. While a few patients may only need one treatment, generally the results are better with three or four.

We are also offering an effective peel for brown spots: the **Melanage MiniPeel**. It consists of a combination of weak acids and potent non-acidic ingredients that do not burn, wound or injure the skin. It is ideal for patients with darker complexions. Generally, you will notice peeling and/or flaking within the first week after the treatment; on a rare occasion flaking will continue off and on within a 60 day period. Some patients will notice improvement after one peel treatment; however two, three or even four peel treatments may be required over a period of one year to resolve stubborn pigmentation problems. You will also have to be very sun protective.

Experience! Many patients treated by Dr Lott with the old CO² laser resurfacing from 1996 to 2000 are looking forward to similar improvements in the skin with a series of Fractional CO² treatments especially with the addition of Botox and Fillers!

Bleach Those Trouble Spots?

These are a couple of our favorite physician dispensed products....

Dermesse™ Skin Lightener (Hydroquinone 4%) – **RX**
Koji-CHQ™ TouchDot (Hydroquinone 2%)

Can Have Beautiful Nails by the Holidays!

DermaNail applied twice daily to the base of the nail can do for you what it has been proven to do for so many others with nail problems. It is not a “quick fix” and can take from 8 to 16 weeks to see improvement in preventing brittleness for longer nail growth and control nail splitting. This product is amazing... be persistent, your patience will be rewarded! Say “goodbye” to acrylics and “hello” to your own healthy nails. Unconditionally satisfaction guaranteed AND 10% off this month!

Read All About It...

Dr Lott and Pam are featured in the September issue of the *Women's Edition* magazine, page 12. There are more details of the **Pixel Perfect & Melanage Peel** treatments as well as an interesting personal story from one of our patients. Pick up an issue or read it online at our website.

Don't forget to see what other valuable info Dr. Lott is sharing in her blogs on our website www.cosmeticdermatologylincoln.com. The August 18th blog is on Dr. Gott and brown spots.

“It’s Not only My Specialty . . . it’s My Passion!”

Do You Have a Plan?

With the start of school be aware that having a plan certainly simplifies things and makes for a happier you! For instance . . .

Your stress level is much lower when you avoid school and game day traffic!

If you are aware of street closings, you save a lot of time by planning an alternate route and leave the house a little earlier so you won’t be late for appointments.

You will be prepared for unexpected company if you plan ahead and have snacks on hand.

Past experience has taught all of us that planning ahead for the holidays is also a very good idea. You know you can write cards and bake in December but if you want to feel confident about the way you look, you need to think about what skin care program you should schedule **NOW**.

With that in mind, CDLC is offering *10% off Fractional CO² Laser and Melanage MiniPeel* treatments as well as featured Bleachers and DermaNail this month. Save \$\$\$, plan ahead and be assured of looking and feeling your very best soon and especially for the holidays!
